FRACTAL TIME

The Secret of 2012 and a New World Age

by

Gregg Braden

In this fascinating book, Gregg Braden merges the modern discoveries of nature's patterns (fractals) with the ancient view of a cyclic universe. The result is a powerful model of time—fractal time—and a realistic window into what we can expect for the mysterious year 2012 . . . and beyond. Because the cycles repeat, the seed for 2012 has already happened and the pattern already exists! In a narrative format of easy-to-read science and true-life accounts, *Fractal Time* shows us what we can expect as we close the Great World Age described by the Mayan Calendar, and the secret to our moment in history.
